

HUAWEI ENTERPRISE ICT SOLUTIONS **A BETTER WAY**

# Converged World – Converged ICT – Converged Network

Huawei IT Products for Cloud Computing

Libor Nedas, Huawei Austria

**enterprise.huawei.com**

HUAWEI TECHNOLOGIES CO., LTD.

# Huawei at a Glance

## Carrier Business

- Fixed Network
- Wireless Network
- Telecom Software
- Core Network
- Service

## Enterprise Business

- Enterprise Networking
- UC&C
- IT
- SecoSpace
- Service

## Consumer Business

- Devices Business
  - Smart phones
  - Home devices
  - MBB devices
- Device Chipsets/ Cloud

77% of revenue from global top 50 telecom carrier

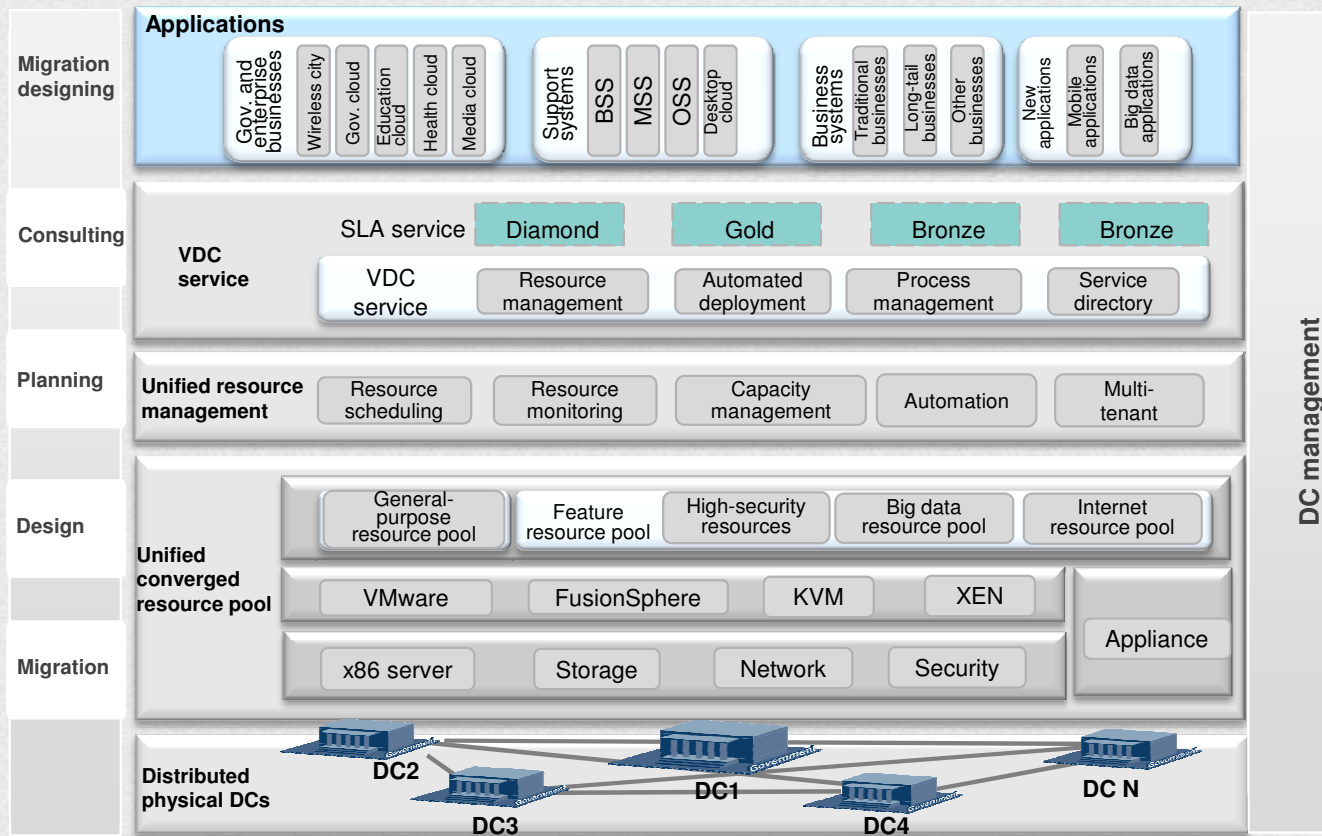

- 5 of Top 10 Banks
- 160+ Power Companies
- 140+ Countries' Public Sectors
- 12 of Top 20 Oil & Gas Companies
- 145,000+ km Highway & Railway

Hundreds of millions of people

# Architecture of HUAWEI Cloud Solution

## Business-centric VDC service

- Independent on-demand VDC service for businesses or organizations
- SLA assurance and on-demand scalability

## Unified management of multiple DCs

- Unified operating, maintenance, and management of heterogeneous clouds and non-storage resources
- Rights- and domain-based management

## Cross-DC converged resource pool

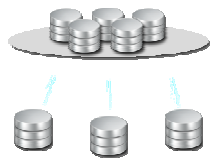

- Virtualized and physical converged resource pools of computing, storage, and network resources
- Cross-DC unified resource scheduling

# Over a Decade of Sustained Investment in Storage Technologies

- **3000+** Developers
- **5** Research centers
- Sharing core technologies and platforms of Huawei chips, networks, hardware and software

# OceanStor Intelligent & Convergent Storage Portfolio

## Footprint of Huawei Server

### Vision:

To be a leading server product and solution provider

### Serve for Carriers

### Innovation

### New Era

## Huawei Server Portfolio

### Reference architecture and solution

Enterprise mailbox solution

HPC solution

Data analysis solution

Virtualization integration solution

RISC-to-IA Migration solution

Database reference architecture

SAP HANA reference architecture

### High-density server

**X6000**  
2U 2/4 nodes

1S HW  
XH310/311

2S HW  
XH320

2S FW  
XH621

**X8000**  
44U  
Cabinet server

1S HW  
DH310

2S HW  
DH320

2S  
DH628

### Blade server

**Blade server**  
E6000

2S/4S server blades

BH620

BH622

BH640

**Converged infrastructure blade server**  
E9000

Full-width/half-width 2S/4S server blades  
GE/10GE/FCoE/InfiniBand switching

CH121

CH220/221

## Huawei Server Product Strategy

## FusionCube - Uniform Platform Supporting Flexible Configurations and Various Enterprise Applications

### High integration

- Space of equipment room required reduced by 50%

### Excellent reliability

- Database deployed on physical servers
- No external cable connection

### High performance

- Built-in distributed storage software
- Built-in 56 Gb/s IB card
- Built-in SSD card

## FusionCube Hardware Platform

### E9000 Based

#### High Performance :

- NVDIMM as Cache
- High Speed PCI-E SSD as Storage

- 1 Leading Computing Density**  
32\*2P nodes and 64\*Romley EP 130W CPU per chassis  
Maximum floating point performance **16.5TFlops** / chassis
- 2 Leading Storage Density**  
CH222 ( Full width ) support **15\*2.5 inch HDDs**  
Single-frame support **120\*2.5 inch HDDs**
- 3 Leading Switch Performance**  
E9000 switch module base on advanced **Huawei DataCenter Switch Technology**  
**15.6T** midplane switch capacity , support maximum **128\*10GE ports** and evolution to **40GE and 100GE**  
Support Ethernet , IB , FC ports, flexible networking
- 4 Leading Reliability**  
Support running at **40°C**  
The failure rate is **15% lower** than competitors
- 5 Leading Energy Efficiency**  
**Rank first** in China Mobile and China Unicom competition testing  
**Chinese green energy certification**
- 6 Convenient O&M**  
**Plug and Play**  
**Automatic configuration and transmission data**, including BIOS, RAID, network card

## Scale On Demand Smoothly

- **Start from small**
- *One chassis - Half configuration with 4 full-width blades*

- Up to 8 chassis concatenation **w/o external switches**
- Up to 4096 vCores, 96TB RAM, and 1.9PB Storage

- Scale out with external switches
- **Auto-discover, auto-configure**
- Up to  $20 \times 3 \times 512 = 30,720$  vCores, 240TB RAM and 6PB Storage

Single Chassis

One Rack with 3 Chassis

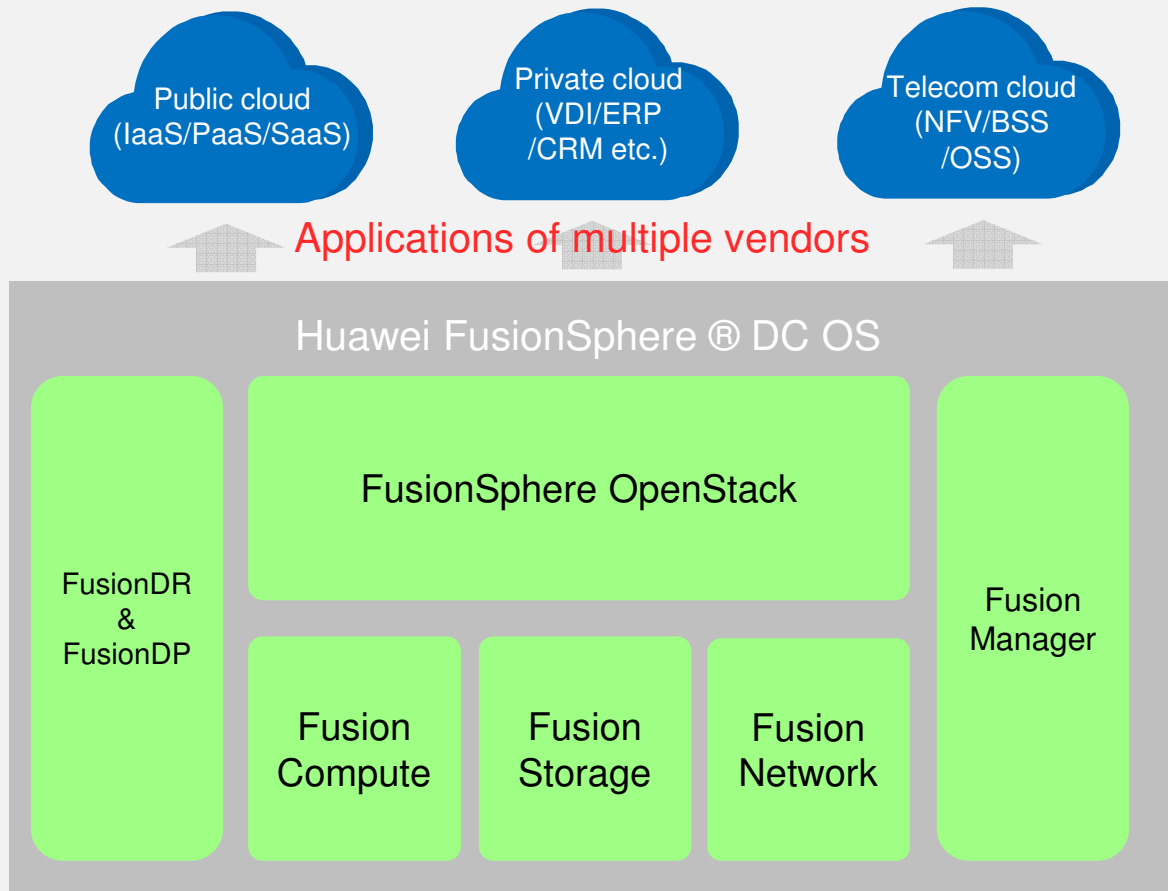

Multiple Racks

Up to 20 Racks

## Top 6 Key Features of FusionSphere 5.0

- ✓ Open cloud services and resource scheduling: Huawei OpenStack (Enterprise Edition)
- ✓ High-performance hypervisor: FusionCompute
- ✓ Enterprise-level distributed software-defined storage: FusionStorage
- ✓ Service-driven, software-defined networking (SDN): FusionNetwork
- ✓ Visualized, centralized, and automatic management engine: FusionManager
- ✓ Disaster recovery (DR) and backup reliability protection: FusionDR & FusionDP

## Core Architecture Features of FusionSphere 5.0

- **Scalability:** Provides a distributed cloud that supports up to 100 data centers (DCs), with 100,000 hosts, 1,000,000 VMs, 1,000,000 network nodes, and 2000 PB storage.
- **High performance:** The computing virtualization performance of FusionSphere is 20% higher than that of VMware. The overlay virtual network forwarding performance of FusionSphere is 300% higher than that of VMware. The storage performance of FusionSphere is 500% higher than that of VMware, because FusionSphere uses software-defined storage that supports 12 million IOPS for 1024 hosts in a resource pool and provides the latency of only 100  $\mu$ s.
- **Zero manual intervention and maintenance:** FusionSphere allows initial management nodes to be installed within 80 minutes, 100 bare hosts to be concurrently installed within 40 minutes, 100 non-linked clone VMs to be created within 30 minutes, 100 linked clones to be created within 2 minutes, and 2000 VMs to be concurrently started within 35 minutes
- **High efficiency of the Service-Oriented Architecture (SOA):** Huawei leverages multiple technologies, such as computing virtualization, software-defined storage and networks, extended OpenStack functions, and open-source OpenStack trunk, to implement SOA decoupling, real-time synchronization with the OpenStack community (maximum synchronization interval: six months), and smooth upgrade.

# Why Huawei?

## Comprehensive solutions

Industry's **most complete** cloud infrastructure  
End-to-end DC solutions

## Constant innovation

A decade of IT technology experience with constant innovation ability  
Cloud Infrastructure Product Innovation Award: Frost & Sullivan 2013

## R&D strengths

**7** global R&D centers with **10000+** R&D engineers

**150+** approved technical standards and **1500+** approved and submitted technology patents

## Excellence

Constant pursuit of best performance and highest cost performance

## Openness

Over **400** business partners  
Membership of over **100** standard organizations

## Service capabilities

Customer-centric service capabilities  
Global operating & localization service

## Recognition

**No. 1** among global developed DC vendors

**No. 2** in terms of growth rate of DCs based on a converged architecture
