

Christopher Vasko

Dr. Cühristopher Vaskó has a PhD in Applied Physics, with experience of working on the interface of various academic fields with industry, as well as high level political and executive decision makers. He has worked on as an engineer on optical projection systems, in political affairs as an expert at the Headquarters of the European Space Agency (ESA) and as telecommunication systems engineer for ESA in the Netherlands. His current role as Quantum and Innovation Engineer in the Communication and Secure Connectivity Directorate encompasses both technical and programmatic activities around building European national and industrial capabilities in quantum- and optical technologies for Satcom.
